Quality Control, Testing, and Detecting during manufacturing

YOKE runs a constant and strict production facility with quality control in every manufacturing stage from raw materials to the completed product. YOKE is an ISO 9001 certified company and has Type Approval by the major international authorities from SABS, ZU, ABS, API, and DNV. YOKE has achieved CNLA certification - Chinese National Laboratory Accreditation which ensures a quality research and development (R&D) department and unsurpassed product engineering.

■ Magnaflux Crack Detection:
   All forged components, each individually magnaflux detected after heat treatment.

■ Proof Load Testing:
   Chain and components are proof load tested at 2.5 times the Working Load Limits with resultant permanent deformation within 1%.

■ Dynamic Fatigue Testing:
   Batch samples of chain and components are Dynamic Fatigue Tested at 1.5 times Working Load Limit for 20,000 cycles.

■ Ultimate Breaking Load Testing:
   Batch samples are Break Load Tested in a static tensile testing machine to ultimate failure. The minimum ultimate force is equal to the Working Load Limit times the safety factor.

■ Spectrographic Analysis:
   To assure of the proper metallurgy content of all raw materials.

■ Eddy Current Detection:
   All load pins are 100% individually inspected after heat treatment.
Safety is our first priority™

- Quality, Reliability, Innovation -
Yellow Point

A total solution product for complex lifting, turning, rotating and tilting.

*WLL:* Working Load Limit

- + WLL=16 (was 12)
- ++WLL=18 (was 12)
**90° Pivot**

- Rotates through 360° and pivot 90°.
- Manufactured from alloy steel, quenched and tempered.
- Manufactured and tested in accordance with EN1677-1.
- Certified by DGUV GS-OA 15-04.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts and cap screw are traceable to Test Certification.
- Bolts are Metric thread (ASME / ANSI B18.3.1M), specification is alloy socket head screw per DIN EN ISO 4762.
- Proof tested to 2.5 times the WLL.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.
- Quick and simple assembly, just a tapped hole is required.

180° Pivot

- Rotates through 360° and pivots 180°, and simultaneously allows lifting from any direction.
- Manufactured from forged alloy steel, quenched and tempered.
- Manufactured and tested in accordance with EN1677-1.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts and cap screw are traceable to Test Certification.
- Bolts are Metric thread (ASME / ANSI B18.3.1M), specification is alloy socket head screw per DIN EN ISO 4762.
- Proof tested to 2.5 times the WLL.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.
- Quick and simple assembly, just a tapped hole is required.

Rotates through 360° and pivots 180°, and simultaneously allows lifting from any direction.

Manufactured from forged alloy steel, quenched and tempered.

Manufactured and tested in accordance with EN1677-1.

Load rated parts are 100% magnaflux crack detected.

Individual forged parts and cap screw are traceable to Test Certification.

Bolts are Metric thread (ASME / ANSI B18.3.1M), specification is alloy socket head screw per DIN EN ISO 4762.

Proof tested to 2.5 times the WLL.

Fatigue rated to 20,000 cycles at 1.5 times the WLL.

All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.

Quick and simple assembly, just a tapped hole is required.

* Design Factor 4:1

- Rotates through 360° adjustable in the direction of the load.
- Manufactured from stainless steel.
- Manufactured and tested in accordance with EN1677-1.
- Individual forged parts and cap screw are traceable to Test Certification.
- Bolts are UNC thread (ASME / ANSI B18.3.1M), specification is alloy socket head screw per DIN EN ISO 4762.
- Proof tested to 2.5 times the WLL.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.
- Quick and simple assembly, just a tapped hole is required.
- Used in different applications such as chemical oil coal industries, food processing, clean room and precision instrument.

Rotates through 360° adjustable in the direction of the load.

Manufactured from stainless steel, quenched and tempered. Captive bolt with high WLL.

Manufactured and tested in accordance with GS-OA-15-04.

Individual forged parts and cap screw are traceable to Test Certification.

Proof tested to 2.5 times the WLL.

Fatigue rated to 1.5 times the WLL.

All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.

Quick and simple assembly, just a tapped hole is required.

Used in different applications such as chemical, oil, coal industries, food processing, clean room and precision instrument.

</table>
• Pivots to 230°, rotates through 360° due to its unique ball bearing design.
• Manufactured from forged alloy steel, quenched and tempered.
• Manufactured and tested in accordance with EN1677-1.
• Certified by DGUV GS-OA-15-04.
• Load rated parts are 100% magnaflux crack detected.
• Individual forged parts and batch code links to Test Certificate sheet.
• Bolts are Metric thread (ASME / ANSI B18.3.1M).
• Proof tested to 2.5 times the WLL.
• Fatigue rated to 20,000 cycles at 1.5 times the WLL.
• All YOKE Super points meet or exceed all the requirements of ASME B30.26.
• Easy to attach or dismantle due to the forged hexagon shaped body of the Super Point
• Capable of rotating under load. Do not turn continuously in 90 degree direction at full load.
• With the new WLL tables you can find the right Super Point attachment for your application and by the red marking on both sides you can measure disposal stage of the Super Point.

### Super Point

**UNC Thread (8-252)**

- **230° Pivot**: Rotates through 360° due to its unique ball bearing design.
- **Manufactured from forged alloy steel, quenched and tempered.**
- **Manufactured and tested in accordance with EN1677-1.**
- **Load rated parts are 100% magnaflux crack detected.**
- **Individual forged parts and batch code links to Test Certificate sheet.**
- **Bolts are UNC thread (ASME / ANSI B18.3.1M).**
- **Proof tested to 2.5 times the WLL.**
- **Fatigue rated to 20,000 cycles at 1.5 times the WLL.**
- **All YOKE Super points meet or exceed all the requirements of ASME B30.26.**
- **Easy to attach or dismantle due to the forged hexagon shaped body of the Super Point.**
- **Capable of rotating under load. Do not turn continuously in 90 degree direction at full load.**
- **With the new WLL tables you can find the right Super Point attachment for your application and by the red marking on both sides you can measure disposal stage of the Super Point.**

</table>
- Pivots to 230°, rotates through 360° due to its unique ball bearing design.
- Manufactured from forged alloy steel, quenched and tempered.
- Manufactured and tested in accordance with EN1677-1.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts and batch code links to Test Certificate sheet.
- Bolts are Metric thread (ASME / ANSI B18.3.1M).
- Proof tested to 2.5 times the WLL.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.
- Easy to attach or dismantle due to the forged hexagon shaped body of the Swivel Point.
- Capable of rotating under load. Do not turn continuously in 90 degree direction at full load.

### DA Swivel Point

**Metric Thread (DA-271)**

![DA Swivel Point Diagram](image)

- **Pivots to 230°, rotates through 360° due to its unique ball bearing design.**
- **Manufactured from forged alloy steel, quenched and tempered.**
- **Manufactured and tested in accordance with EN1677-1 and DNV GL–ST-0378.**
- **Certified by DNV GL–ST-0378.**
- **Load rated parts are 100% magnaflux crack detected.**
- **Individual forged parts and batch code links to Test Certificate sheet.**
- **Bolts are Metric thread (ASME / ANSI B18.3.1M).**
- **Proof tested to 2.5 times the WLL.**
- **Fatigue rated to 20,000 cycles at 1.5 times the WLL.**
- **All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.**
- **Easy to attach or dismantle due to the forged hexagon shaped body of the DA Swivel Point.**
- **Capable of rotating under load. Do not turn continuously in 90 degree direction at full load.**

- Rotates through 360° and pivots 180°, and simultaneously allows lifting from any direction.
- Manufactured from forged alloy steel, quenched and tempered.
- Manufactured and tested in accordance with EN1677-1.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts and cap screw are traceable to Test Certification.
- Bolts are Metric thread (ASME / ANSI B18.3.1M), specification is alloy socket head screw per DIN EN ISO 4762.
- Proof tested to 2.5 times the WLL.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.
- Quick and simple assembly, just a tapped hole is required

Y PSA

Anchor Point for Personal Protective Equipment
- Rotates through 360° adjustable in the direction of the load.
- Manufactured from forged alloy steel, quenched and tempered.
- Manufactured and tested in accordance with EN795.
- Certified by PSA of DGUV.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts and cap screw are traceable to Test Certification.
- Passed 22.2 KN/person Load testing.
- Passed 150 kg dynamic fall testing (EU standard is 100 kg).
- Meets all requirements of the German BG BAU (Employer’s insurance association of the building industry).
- Meets all requirements of DIN EN795, DIN EN50308, OSHA1926.502.
- Acc. to DIN EN 365 including statement for the number of load bearing persons is 1-2 persons.
- Correspond to the European Directive for “personnel protection equipment” (89/686/ EWG).
- YOKE yellow powder coating for high visibility.
- PSA - Lifting point to be as an anchor point for personal protective equipment.

- Rotates through 360° adjustable in the direction of the load.
- Manufactured from forged stainless steel.
- Manufactured and tested in accordance with EN795.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts and cap screw are traceable to Test Certification.
- Passed 22.2KN/person load testing.
- Passed 150 kg dynamic fall testing (EU standard is 100 kg).
- Meets all requirements of the German BG BAU (Employer’s insurance association of the building industry).
- Meets all requirements of DIN EN795, DIN EN50308, OSHA1926.502.
- Acc. to DIN EN 365 including statement for the number of load bearing persons is 1-2 persons.
- Corresponds to the European Directive for "personnel protection equipment" (89/686/ EWG).
- YOKE yellow powder coating for high visibility.
- Suitable for permanently outdoor application.
- PSA-INOX Lifting point to be as an anchor point for personal protective equipment.

- Pivots 180° and allows side load lifting.
- Manufactured from forged alloy steel, quenched and tempered.
- Manufactured and tested in accordance with EN1677-1.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts are traceable to Test Certification.
- Supplied without bolts; usage of Grade 10.9 or Grade 12.9 bolts is recommended.
- Proof tested to 2.5 times the WLL.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.

WELDING INSTRUCTIONS

The welding should only be carried out by qualified welder according to Standards, e.g. EN 287 or AWS.

Support material

● Material of the welding block is S355J2+N (1.0577+N, St 52-3N, B.S. 4360.50D, AISI 1019 etc.).

● Prior to welding, the contact areas must be free from impurities, oil, paint, rust, scale, etc., for example by grinding. If the surface is at all corroded, all rust must be completely removed from the weld area. Painted surface must be prepared in the same way.

● The steel support member must have a carbon content of no more than 0.40%.

● In ambient temperature of 10°C and below, pre-heating of the weld area prior to welding must be carried out.

Seam welding

● The welds must be sufficiently strong to take the required loads.

● Before starting the final weld pass, clean well the root pass to avoid inclusions.

● The complete welding operation must be carried out continuously so that the parts do not have time to cool.

● Effects of temperature

  • The complete construction can be annealed stress release at <600°C without reduction of WLL.

  • Do not rapidly cool the weld.

● A thorough inspection of the weld should be performed. No cracks, pitting, inclusions, notches or undercuts are allowed. If doubt exists, use a suitable NDT method, such as magnetic particle or liquid penetrant to verify.

● If repair is required, grind out the defect and re-weld using the original qualified procedure.

Welding materials

● Weld materials must have a minimum tensile strength of 70,000 PSI (such as AWS A5.1 E-7018), following the electrode manufacturer's recommendations. Reference information as below:

  MIG arc welding:

  • Wire diameter 0.8 - 1.2 as per DIN 8559-SG 3, AWS A 5.18.

  • Important: do not weld in the open air during bad weather

• Manufactured from forged alloy steel, quenched and tempered.
• Manufactured and tested in accordance with EN1677-1.
• Certified by DGUV GS-OA-15-03.
• Load rated parts are 100% magnaflux crack detected.
• Individual forged parts are traceable to Test Certification.
• Proof tested to 2.5 times the WLL.
• Fatigue rated to 20,000 cycles at 1.5 times the WLL.
• All YOKE Lifting points meet or exceed all the requirements of ASME B30.26.
• WLL forged onto each product for quick and easy identification.
• Lugs designed to assist the welding process.
• A protected spring keeps the load ring in a required position. The parts are connected in such a way that they remain captive. The spring also reduces noise caused by vibrations.

* Design factor 4:1

- Pivots 180°, designed minimizes head room.
- Manufactured from forged alloy steel, quenched and tempered.
- Manufactured and tested in accordance with EN1677-1.
- Load rated parts are 100% magnaflux crack detected.
- Individual forged parts are traceable to Test Certification.
- Proof tested to 2.5 times the WLL.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- The two points of attachment facilitate an even and optimal force distribution into the work piece and thus, usage of thinner base plates is possible.
- The welding block is forged out of material with excellent welding properties.
- Low profile design with high strength.
- The ring is stowable thus avoiding the hazards of tripping and snagging.
DANGER: Overhead lifting presents a very real danger of severe injury or loss of life if lifting equipment is not used properly. Please read and understand all of these instructions prior to using any lifting sling or sling assembly. Sling should only be used by qualified persons who are responsible for the sling selection, inspection and use.

**Safety factor 4:1 above limits are valid for standard use and equally loaded slings. Properly use and maintaince of your YOKE chain slings will give long life and enable you to carry out your lifting operations efficiently and safely.**

**Warning: Never exceed a vertical slinging angle of 60°**

SAFE USE

● Never load in excess of the rated capacity for the application.
● Keep a record of all slings in use.
● User should remove all twists from a chain leg before lifting and, should never knot a chain.
● Always use YOKE shortening hook or clutch when chain slings should be shortened.
● Always inspect to insure that chain is free from damage or wear before use.
● Always inspect all sling components prior to each use.
● Ensure that chain is protected from any sharp corners on the load.
● Ensure that the master link articulates freely on the hook of the crane or other lifting appliance.
● Never tip load hooks. The load should always be supported correctly in the bowl of the hook.
● Always use the correct size sling for the load, allowing for the included angle and the possibility of unequal loading.
● Personnel must keep all body parts from between the sling and the load, and from between the sling and the crane/hoist hook. Persons shall never ride the chain sling/rope sling or web sling or the load during lifting or while suspended. Persons must stand clear of all loads while lifting or while suspended. During lifting, with or without the load, personnel must be alert for possible snagging of the load or the chain sling.

MAINTENANCE

● A thorough examination should be carried out by a competent person at intervals at least every year or more frequently according to statutory regulations, type of use and past records.
● Chains with bent links or with cracks or gouges in the link should be replaced, as should deformed components such as bent master links, deformed hooks and any fittings showing signs of damage.
● Chain and components wear should never exceed 10% of the original dimensions.
● Once a chain sling has been overloaded it must be taken out of service.
● Store chain slings on a properly designed rack. They should not be left lying on the floor where they may suffer mechanical or corrosion damage or may be lost.

LIMITATION ON USE

● YOKE alloy chain or chain slings should not be used in acid or caustic solutions nor in heavily acidic or caustic laden atmospheres. The high tensile strength of the heat treated alloy material in alloy steel chains and components is susceptible to hydrogen embrittlement when exposed to acids.
● YOKE slings must not be heat-treated, galvanized, plated, coated or subject to any process involving heating or pickling. Each of these processes can have dangerous effects and will invalidate the manufacturer certificate.
● YOKE slings may be used at temperatures between -40°C to 200°C with no reduction in the working load limit. The use of YOKE chain slings within the permissible temperature range in the table below does not require any permanent reduction in working load limit when the chain sling is returned to normal temperatures. A sling accidentally exposed to temperatures in excess of the maximum permissible should be withdrawn from service immediately and returned to the distributor for thorough examination.
● When using YOKE slings in exceptionally hazardous conditions, the degree of hazard should be assessed by a competent person and the Working Load Limit adjusted accordingly. Examples are lifting of potentially dangerous loads such as molten metals, corrosive materials or fissile material and including certain offshore activities.

- Design Factor 4:1.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- Tempering temperature at a minimum of 400°C.
- Each link is marked with batch number that links to the test certificate with full traceability to raw materials.
- Fully integrated shortening clutch and master link.
- No reduction in WLL when shortening chain.
- Speedy assembly.
- Light weight system.
- Cost effective compared to slings which use multiple components.

- Proof Load tested at 2.5 times the WLL with certification for each batch manufactured.
- Design Factor 4:1.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- Tempering temperature minimum 400°C
- Magnaflux crack detection is performed 100% on each batch.

⚠️ When using hoist hook with grade 100 chain, YOKE hoist hook is recommended to be grinded the WLL (which is for a safety factor 5:1) off the hook.

⚠️ WARNING INFORMATION: This hook is a positioning device and is not intended to rotate under load. For swivel hooks designed to rotate under load, see 8-175N.
When using hoist hook with grade 100 chain, YOKE hoist hook is recommended to be grinded the WLL (which is for a safety factor 5:1) off the hook.

**G-100 Alloy Swivel Bearing Hoist Hook**

with Ball Bearing, which performs full swivel under load.

★ Design factor 4:1 proof tested and certified.

- Quenched and Tempered Alloy Steel.
- At least 25% greater WLL than traditional G80 products.
- Manufactured in accordance with EN 1677-2 and ASME B30.26.
- Proof Load tested at 2.5 times the WLL with certification for each batch manufactured.
- Design Factor 4:1.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- Tempering temperature minimum 400°C
- Magnaflux crack detection is performed 100% on each batch.
- Built with ball bearing and enables full swivel feature under load.
G-100 Eye Foundry Hook

- Quenched and Tempered Alloy Steel.
- At least 25% greater WLL than traditional G80 products.
- Manufactured in accordance with DIN PAS 1061 and ASTM A952/A 952M, EN 1677-1.
- Proof Load tested at 2.5 times the WLL with certification for each batch manufactured.
- Design Factor 4:1.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- Tempering temperature minimum 400°C
- Not used for general chain sling applications, rather for use where a large throat opening is necessary.
- Before using the hook, check whether hooks without safety latches are allowed to be used for the particular application.

* Design factor 4:1 proof tested and certified

- Quenched and Tempered Alloy Steel.
- Manufactured in accordance with EN 1677-1.
- Manufactured in accordance with ASTM A952/A952M, DIN PAS 1061.
- Proof Load tested at 2.5 times the WLL with certification for each batch manufactured.
- Design Factor 4:1.
- Fatigue rated to 20,000 cycles at 1.5 times the WLL.
- Tempering temperature minimum 400°C
- Magnaflux crack detection is performed 100% on each batch.

★ American Patent

X-P950

For push lock replacement
• Quenched and Tempered Alloy Steel.
• Manufactured in accordance with EN 1677-1.
• Manufactured in accordance with ASTM A952/A952M, DIN PAS 1061.
• Proof Load tested at 2.5 times the WLL with certification for each batch manufactured.
• Fatigue rated to 20,000 cycles at 1.5 times the WLL.
• Tempering temperature minimum 400°C
• Magnaflux crack detection is performed 100% on each batch.

DISCOVERY VIDEO
DANGER: Overhead lifting presents a very real danger of severe injury or loss of life if lifting equipment is not used properly. Please read and understand all of these instructions prior to using any lifting sling or sling assembly. Sling should only be used by qualified persons who are responsible for the sling selection, inspection and use.

</tbody>
</table>

**Safety factor 4:1 above limits are valid for standard use and equally loaded slings. Proper use and maintenance of your YOKE chain slings will give long life and enable you to carry out your lifting operations efficiently and safely.

Warning: Never exceed a vertical sling angle of 60°
SAFE USE

- Never load in excess of the rated capacity for the application.
- Keep a record of all slings in use.
- User should remove all twists from a chain leg before lifting and, should never knot a chain.
- Always use YOKE shortening hook or clutch when chain slings should be shortened.
- Always inspect to insure that chain is free from damage or wear before use.
- Always inspect all sling components prior to each use.
- Ensure that chain is protected from any sharp corners on the load.
- Ensure that the master link articulates freely on the hook of the crane or other lifting appliance.
- Never tip load hooks. The load should always be supported correctly in the bowl of the hook.
- Always use the correct size sling for the load, allowing for the included angle and the possibility of unequal loading.
- Personnel must keep all body parts from between the sling and the load, and from between the sling and the crane/hoist hook. Persons shall never ride the chain sling/rope sling or web sling or the load during lifting or while suspended. Persons must stand clear of all loads while lifting or while suspended. During lifting, with or without the load, personnel must be alert for possible snagging of the load or the chain sling.

MAINTENANCE

- A thorough examination should be carried out by a competent person at intervals at least every year or more frequently according to statutory regulations, type of use and past records.
- Chains with bent links or with cracks or gouges in the link should be replaced, as should deformed components such as bent master links, deformed hooks and any fittings showing signs of damage.
- Chain and components wear should never exceed 10% of the original dimensions.
- Once a chain sling has been overloaded it must be taken out of service.
- Store chain slings on a properly designed rack. They should not be left lying on the floor where they may suffer mechanical or corrosion damage or may be lost.

LIMITATION ON USE

- YOKE alloy chain or chain slings should not be used in acid or caustic solutions nor in heavily acidic or caustic laden atmospheres. The high tensile strength of the heat treated alloy material in alloy steel chains and components is susceptible to hydrogen embrittlement when exposed to acids.
- YOKE slings must not be heat-treated, galvanized, plated, coated or subject to any process involving heating or pickling. Each of these processes can have dangerous effects and will invalidate the manufacturer certificate.
- YOKE slings may be used at temperatures between -40°C to 200°C with no reduction in the working load limit. The use of YOKE chain slings within the permissible temperature range in the table below does not require any permanent reduction in working load limit when the chain sling is returned to normal temperatures. A sling accidentally exposed to temperatures in excess of the maximum permissible should be withdrawn from service immediately and returned to the distributor for thorough examination.
- When using YOKE slings in exceptionally hazardous conditions, the degree of hazard should be assessed by a competent person and the Working Load Limit adjusted accordingly. Examples are lifting of potentially dangerous loads such as molten metals, corrosive materials or fissile material and including certain offshore activities.

## Round Sling Self Locking Hook

**YOKE Roundsling Self Locking Hook** is designed in a way to solve your synthetic end-fitting problems. The Round Sling Self Locking Hook presents following utmost benefits:

1. The Round Shape is designed to provide great protection to your synthetic roundsling on every loading.
2. Offer complete range of hooks from 1 tonnes up to 21.2 tonnes.
3. Assembly is fast and easy with only a hammer required.
4. The hook with **Self Locking function** meets real safe and safer required.
5. Acquired certificate approved by BG German company.

YOKE Insulation Solution

- YOKE Insulated Swivel is designed for winch protection in overhead crane during welding operations.
- Heavy hoisting with a strong but lightweight system.
- Individual swivels & components are proof load tested to a minimum of 2.5 times the working load limit.
- All Swivels are individually tested during manufacturing to assure 1000 Volts insulating property. Test certificate is packaged with each unit shipped.
- YOKE Insulated Swivels are designed with ball bearing which performs to fully swivel under Load.
- Acquired certificate approved by Deutsche Gesetzliche Unfallversicherung (DGUV).

Tested acc. to EN 1677

YOKE's innovative, fine design with "Coupling Pin" system hook is able to solve any of your problems in Chain, Wire Rope and Synthetic Slings.

The hook:
1. Create safer lifting with the use of "Self Locking" system.
2. Assembly is fast and easy with only a hammer required.
3. Acquired certificate approved by BG German company.
4. Patent: Taiwan, China, France, Germany, Italy, Japan, USA, Switzerland.
Insulated Blank Swivels.

with Ball Bearing

Individually tested to resist 1000 Volts insulated with Test Certificate.

Design for protection of overhead crane during welding operations on suspended loads.

### Grade 80 Fittings

- Forged, low carbon steel.
- Adjustable Yoke End (also) called "clevis ends" are typically assembled to the end of a rod, pope, tube or cable linkage and are then attached via a clevis pin to a mounting point.

#### Yoke End (clevis end)

**Threaded**

**WARNING**

NEVER EXCEED PUBLISHED WORKING LOAD LIMIT.
DNV 2.7-1
TYPE APPROVAL
Offshore Container Lifting Operation
Offshore Container Lifting Operation.

Quality Management System:
The Features of YOKE  
DA™ Offshore Container Lifting Series

YOKE DA™ Series are manufactured to meet the requirements of DNV 2.7-1 for offshore container lifting to fulfill the need for the critical requirements of charpy impact, strength and ductility.

Lower Temperature Demand
YOKE DA™ Series are designed to withstand impacts in extreme environments down to maximum -40°C.

Higher Safety Factors
YOKE DA™ Shackles have a design factor of 6 for Grade 6 Shackles and a design factor of 8 for Grade 8 shackles, and YOKE DA™ Master Link & Assembly have a design factor of 5 to enable them to operate in the harshest environments.

DNV 2.7-1 Specified Test Certificate
Test certificate with material and manufacturing process specified in DNV 2.7-1 for complete traceability.

To perform in the harshest weather and roughest sea conditions, YOKE DA™ Series are specially designed, manufactured and tested for the operating in the offshore container industry.
TYPE APPROVAL CERTIFICATE

This is to certify:
That the Lifting set for Offshore containers and Portable Offshore Units

with type designation(s)
Master Link - Type DA-001,
Master Link Assembly - DA-007

Issued to
Yoke Industrial Corp.
Taichung, Taiwan

is found to comply with
DNV GL standard DNVGL-ST-E271 – 2.7-1 Offshore containers, August 2017
DNV GL standard DNVGL-ST-E273 – 2.7-3 Portable offshore units, December 2016
EN 1677-4 Components for slings – Safety – Part 4: Links, Grade 8
ISO 10855-2:2018 Offshore containers and associated lifttings sets – Part 2: Design, manufacture and testing of lifting sets
IMO/MSC Circular 860

Application:
Grade 8 Links for Lifting Sets for Offshore Containers or Portable Offshore Units

Issued at Høvik on 2018-09-13

This Certificate is valid until 2020-10-20.

DNV GL local station: Kaohsiung

Approval Engineer: Nina Thorvaldsen Moberg

Inger-Helene Hals
Head of Section
TYPE APPROVAL CERTIFICATE

This is to certify:
That the Lifting set for Offshore containers and Portable Offshore Units

with type designation(s)
Bolt Pin Anchor Shackles - Type DA-808 - Design Temperature -40°C
Bolt Pin Anchor Shackles - Type DA-838 - Design Temperature -40°C

Issued to
Yoke Industrial Corp.
Taichung, Taiwan

is found to comply with
DNV GL standard DNVGL-ST-E271 – 2.7-1 Offshore containers, August 2017
DNV GL standard DNVGL-ST-E273 – 2.7-3 Portable offshore units, December 2016
EN 13889 Forged steel shackles for general lifting purposes - Dee shackles and Bow shackles
- Grade 6 - Safety
IMO/MSC Circular 860

Application:
Shackles for Lifting Sets for Offshore Containers and Portable Offshore Units

Issued at Hovik on 2019-07-24

This Certificate is valid until 2024-06-29.
DNV GL local station: Kaohsiung
Approval Engineer: Nina Thorvaldsen Moberg

Inger-Helene Hals
Head of Section
TYPE APPROVAL CERTIFICATE

This is to certify:
That the Hook
with type designation(s)
Hooks DA-025 & DA-027N

Issued to
Yoke Industrial Corp.
Taichung, Taiwan

is found to comply with
DNV GL standard DNVGL-ST-0378 – Standard for offshore and platform lifting appliances

Application:
Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV GL.

Issued at Høvik on 2017-05-31
This Certificate is valid until 2022-05-30.
DNV GL local station: Kaohsiung
Approval Engineer: Antonio Sendin Alvarez

for DNV GL
Digitally Signed by: aldo.matteucci@dnvg.com
Location: DNV GL, Høvik, Norway
Signing Date: 01.06.2017
Aldo Matteucci
Head of Section

WARNING
NEVER EXCEED PUBLISHED WORKING LOAD LIMIT.
TYPE APPROVAL CERTIFICATE

This is to certify:
That the Chain, shackles, swivels, sockets
with type designation(s)
Lifting points DA-271 for offshore cranes

Issued to
Yoke Industrial Corp.
Taichung, Taiwan

is found to comply with
DNV GL standard DNVGL-ST-0378 – Standard for offshore and platform lifting appliances

Application:
Product(s) approved by this certificate is/are accepted for installation on all vessels classed
by DNV GL.

This Certificate is valid until 2022-05-29.
Issued at Høvik on 2017-05-30

DNV GL local station: Kaohsiung

Approval Engineer: Antonio Sendin Alvarez

Aldo Matteucci
Head of Section

This Certificate is subject to terms and conditions oversea. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

Safety is our first priority™
- Quality, Reliability, Innovation -
Welded alloy steel, quenched and tempered.

Tested and manufactured in accordance with DNV 2.7-1, EN 1677-4, ASME B30.26.

Certified by DNV 2.7-1.

Fatigue rated to 20,000 cycles at 1.5 times the Working Load Limit (WLL).

Charpy tested in accordance with DNV 2.7-1.

Proof Load tested to 2.5 times the Working Load Limit (WLL).

Design factor 5:1.

Charpy test of 42 joules (31ft. lbs.) at -40°C (-40°F) for normal section.

Charpy test of 27 joules (20ft. lbs.) at -40°C (-40°F) for welded section.

DA Swivel Self Locking Hook

With Ball Bearing, which performs full swivel under load

- Forged alloy steel, quenched and tempered.
- Tested and manufactured in accordance with EN 1677 and Norsok R002.
- Certified by DNV GL-ST-0378.
- Fatigue rated to 20,000 cycles at 1.5 times the Working Load Limit (WLL).
- Charpy tested in accordance with DNV GL-ST-0378.
- Designed with recessed trigger and ball bearing, providing the locking mechanism being protected against inadvertent opening due to entanglement with any obstruction during lifting.
- Design factor 4:1 and 5:1.
- Latch mechanism is self locking under loading.
- Charpy test of 42 joules (31ft. lbs.) at -20°C (-4°F).

DA Swivel Point

Metric Thread (DA-271)

With Ball Bearing, which performs full swivel under load

- Forged alloy steel, quenched and tempered.
- Tested and manufactured in accordance with EN1677-1 and DNV GL-ST-0378 and ASME B30.26.
- Certified by DNV GL-ST-0378.
- Fatigue rated to 20,000 cycles at 1.5 times the Working Load Limit (WLL).
- Charpy tested in accordance with DNV GL-ST-0378.
- Proof Load tested to 2.5 times the Working Load Limit (WLL).
- Pivots to 230°, rotates through 360° due to its unique ball bearing design.
- Design factor 4:1.
- Easy to attach or dismantle due to the forged hexagon shaped body of the DA Swivel Point.
- Maximum WLL in axial direction when load ring is aligned.
- Capable of rotating under load. Do not turn continuously in 90 degree direction at full load.

★ Minimum Ultimate Load is 4 times the Working Load Limit.
Maximum Proof Load is 2 times the Working Load Limit.

---

**WARNING**

NEVER EXCEED PUBLISHED WORKING LOAD LIMIT.

ROV: Remotely Operated Vehicle
- Forged alloy steel, quenched and tempered.
- Designed specifically for ROV application.
- Individually stamped with the Working Load Limit.
- Painted yellow for high visibility subsea.

### Additional Information
- **WARNING**: NEVER EXCEED PUBLISHED WORKING LOAD LIMIT
- **Copyright © 2018 YOKE Industrial Corp. All Rights Reserved.**
YSB sheaves are closed die drop forged steel. Available in size from 3” to 12” satisfying your heavy duty applications.

Groove bottom hardened to 35 Rc maximizes durability of Snatch Blocks.

Light Snatch Block with Shackle

- YOKE Light Snatch Blocks are manufactured of the highest quality tensile steel.
- Available from 2 tonnes to 8 tonnes, for wire rope sizes 8mm to 19mm.
- Part number, wire rope size and working load limit are marked on each block.
- Permanent batch codes link to test certificates for easy traceability.
- Supplied with bronze bushings and 4.5"-14" with pressure lube fittings.
- Meets or exceeds all requirements of ASME B30.26.
- Safety factor 4:1
- Fatigue rated

- Available in 12 tonnes, for wire rope sizes 19mm to 22mm.
- Part number, wire rope size and working load limit are marked on each block.
- Permanent batch codes link to test certificates for easy traceability.
- Supplied with bronze bushings and pressure lube fittings.
- Meets or exceeds all requirements of ASME B30.26.
- Safety factor 4:1
- Fatigue rated

**NEVER EXCEED PUBLISHED WORKING LOAD LIMIT**

**WARNING**

- YOKE 8-730 Opened Swage Sockets are forged from special bar quality carbon steel with very finest hardness controlled by spheroidize annealing.
- YOKE Swage Sockets properly applied have an efficiency rating of 100% based on the catalog strength of wire rope.
- YOKE Swage Sockets are recommended for use with 6x19, 6x37, and IWRC wire rope. They are approved for use with galvanized bridge rope.
- YOKE Swage Sockets are not recommended for use on fiber core or lang lay rope.
- Galvanized finish.

---

For all slings swaged with sockets, proof load in accordance with ASME B30.9.

Forced Alloy Chain Shackle
with Bolt Pin

- Shackles are Type Approved by ABS.
- Shackles are forged alloy steel with alloy pin.
- Size and the Working Load Limit permanently shown on each shackle.
- All shackles with Batch Code which links to Test Certificate and quality traceability.
- 100% magnaflux crack detection during manufacturing.
- 20,000 cycle fatigue rated to 1.5 times Working Load Limit.
- Galvanized finish.

## Wire Rope Clip

- Galvanized finish.
- Forged base for full range of sizes.
- According to the breaking load of the wire rope, YOKE wire rope clips have an efficiency rating of 80% for 1/8” - 7/8” sizes, and 90% for sizes 1” up to 3”.
- Manufactured with or exceeds all requirements of ASME B30.26 and EN13411 -2003.

Yoke Wire Rope Clip in accordance with FF-C-450 TYPE 1 CLASS 1 and EN13411-2003.

● YOKE Swivels are manufactured using the highest grade of material available.
● YOKE Swivels are designed with a safety factor of 5:1.
● YOKE Swivels are available in sizes from 3/4 Tons to 35 Tons.
● YOKE Swivels are available for wire lines 1/4" to 1-1/2".
● YOKE Swivels are zinc plated for corrosion resistance and longer life.
● YOKE Swivels are manufactured with grease fittings for superior performance.
● YOKE Swivels are designed for low starting torque and high rotation speed.
● All Swivels parts are 100% magnaflux crack detected.
● 20,000 cycle fatigue rate to 1.5 times working load limit.
● All parts with batch number for quality certified and traceability.

Minimum Ultimate Load is 5 times the Working Load Limit. Maximum Proof Load is 2 times the Working Load Limit.
YOKE alloy shank hoist hook are manufactured from the finest quality alloy steel.

- YOKE shank hoist hook are quenched and tempered.
- 20,000 cycle fatigue rate to 1.5 times working load limit.
- All shank hoist hooks are 100% magnaflux crack detected.
- All parts with batch number for quality certified and traceability.
- YOKE Shank Hoist Hooks are proof tested to 2 times the working load limit.
- YOKE Shank Hoist Hooks are supplied without threads.
- YOKE Shank Hoist Hooks are Predrilled to accept a YOKE latch kits.
- YOKE Shank Hoist Hooks are supplied with certification for each hook.

**d min**: After machining the shank, proof loading must be carried out.

**NEVER EXCEED PUBLISHED WORKING LOAD LIMIT**

**WARNING**

- YOKE carbon shank hoist hook are manufactured from the finest quality carbon steel.
- YOKE shank hoist hook are quenched and tempered.
- 20,000 cycle fatigue rate to 1.5 times working load limit.
- All shank hoist hooks are 100% magnaflux crack detected.
- All parts with batch number for quality certified and traceability.
- YOKE Shank Hoist Hooks are proof tested to 2 times the working load limit.
- YOKE Shank Hoist Hooks are supplied without threads.
- YOKE Shank Hoist Hooks are Predrilled to accept a YOKE latch kits.
- YOKE Shank Hoist Hooks are supplied with certification for each hook.

**Minimum Ultimate Load is 5 times the Working Load Limit. Maximum Proof Load is 2 times the Working Load Limit.**

**d min.** After machining the shank, proof loading must be carried out.

YOKE alloy swivel hoist hook are manufactured from the finest quality alloy steel.

YOKE swivel hoist hook are quenched and tempered.

20,000 cycle fatigue rated to 1.5 times of 4:1 WLL, Hook Code AA and KK to 1.5 times of 5:1 WLL.

All swivel hoist hooks are 100% magnaflux crack detected.

All parts with batch number for quality certified and traceability.

YOKE Swivel Hoist Hooks are proof tested to 2.5 times of 4:1 WLL. Hook Code AA and KK to 2 times of 5:1 WLL.

YOKE Swivel Hoist Hooks are Predrilled to accept a YOKE latch kits.
YOKE carbon swivel hoist hook are manufactured from the finest quality carbon steel.

- YOKE swivel hoist hook are quenched and tempered.
- 20,000 cycle fatigue rate to 1.5 times working load limit.
