It's Official – The YOKE 8-088N 1000V

Insulated Swivel Is Coming!

Following a comprehensive review, we are delighted to inform you that the “Original” 8-088 insulated swivel is back in the YOKE range with improved rotation capabilities with new Item No. 8-088N.

As before, it has all the features that makes is one of the most sought after insulated swivels in the industry today:

- Individually tested to ensure insulation capability of 1,000 volts
- Manufactured in accordance with EN1677-1 Type tested by DGUV
- Grade 80
- Thrust bearing design to swivel under full load
- 100% proof load tested at 2.5 times WLL
- Design factor 4:1
- Range 2t through to 12.5t WLL

The YOKE 8-088N insulated swivel is available with a complete range of fittings, designed with the unique “Coupling Pin” connections offering a solution for chain, wire rope or synthetic sling terminations.

YOKE insulated swivels are designed to protect the user of overhead cranes who carry out welding operations on suspended loads.

Please contact your YOKE Account Manager for further details.
