

## YOKE Has established Technology Research and Development Center

On the 26<sup>th</sup> July 2017, YOKE Industrial Corporation is pleased to establish Technology Research and Development Center (TRDC) at the National Taiwan University.

The National Taiwan University, rated as the best university in Taiwan is well-known for industrial invention and professional accumulated techniques. Mr. Steven Hong and Mrs. Susan Yen, Chairman and Vice Chairman of Yoke Industrial Corporation with 8 team members were participating in the unveiling ceremony which opens up revolutionary technology improvements for YOKE Industrial Corporation and would in turn triggers higher potential of the YOKE brand.

The aims of the TRDC can create incomparable advantages for YOKE:

- Make Progress of Manufacturing Processing
- Develop YOKE New-Generation Materials
- Launch Innovative Products

- Enhance Technological Development
- Consolidate the Intellectual Resources and Patents Arrangement
- Establish Information Management and Data Analysis
- Increase YOKE's International Competitiveness

The four latest issues to focus on are:

1. The development of innovative G120 material for all product lines.
2. Automatic and standardized design and production of fall arrester products.
3. Patents applied for protecting new ideas of products.
4. The new project of RFID which builds up the platform for both the information management and analysis system. The effective creation of an APP could certainly improve international competition for YOKE.

With the long-term partnership with the National Taiwan University and brand new research areas could definitely pave the path for product improvement and simultaneously create an incredible value for global customers.
